Hatybov, Spiders, and the UFO Enigma : A Subset of the
Land Management System

sagesigma.blogspot.com/2015/07/hatibow-spiders-and-ufo-enigma-subset.html

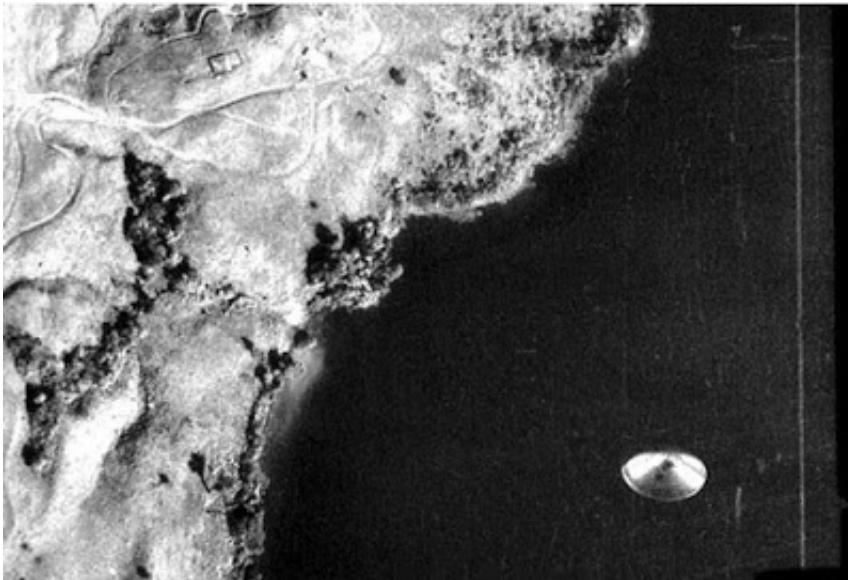

I'm not going to lie; I've been obsessed by the Unidentified Flying Object (UFO) enigma for most of my life (at least as long as I've been able to read). I've got a book shelf filled with Vallee, Keel, Layne, Van Tassel, and even Constable. You start with the standard Extraterrestrial (ET) hypothesis, then move to a military-industrial hypothesis, then to a cryptoterrestrial hypothesis, then to the ultradimensional hypothesis, and then to an orgonite based sky critters theory, and back again, and still not really have any sense of what is going on. Yet they continue to be seen everyday, and no one still has any clue of what they are (or at least is not sharing information with the rest of us).

Returning to the enigma of Hatybov/Hatibow (I use Hatibow in each post as it appears it was once his email

address), and his published works on line, I would like to attempt to define UFO / UFO occupants from the Super System -> System -> Subsystem paradigm. So let's attempt it, shall we?

The UFO Baseline

Anyone who has seen Crrow's or Houston Skywatcher's videos regarding UFOs are typically in awe of what is being seen; at least I am. I'm certain there are countless other skywatching videos out there that I have not seen, but for the sake of this post, let's assume the following characteristics are attributable to UFOs filmed by the above mentioned skywatchers :

- Typically shadow-esque, semitransparent, or transparent craft observed

- Orbs that are moving up / down left / right
- In some cases shooting apparent lasers at something in atmosphere
- Odd shaped craft that wobble across the horizon

The feedback I typically receive when I show these clips to a friend or to a coworker usually moves along this line of progression : “That’s just a satellite’, to ‘that’s a space ship’, to ‘that’s a plane’, to ‘that’s ‘secret’ military plane’, to maybe, just maybe, ‘is that a UFO from outer space?’” Yet I never receive a reaction to the extent of “Is that some sort of monitoring/feedback probe hovering in the atmosphere?” Perhaps that question is not meant to be asked by design.

As Hatibow states in his intro, “Horse Diploma/Modern Science vs The Concept of a New World” table in a number of articles, UFOs are defined by both perspectives as such :

Modern Science	The Concept of a New World
UFO – occasional appearance of aliens, their study engaged everyone.Soon their secret will	All terrestrial origin UFO is – equipment for monitor-

be revealed, and their weapons will become the property of the Earth.

ing the state of the environment (such as a probe).

At a very high level, it is the intent of the Super System to set start times and initiate programs to Earth. Also of note, it is the intention of our own Super System to protect its information and physical properties from “interference from other Super Systems.” Quite bluntly, in respect to Earth, no “extraterrestrial” is allowed to fly to Earth from some other planet or galaxy. Any biological structures approaching our solar system will be detected and destroyed by the previously described Super System. In essence, the infamous Spider race who settled in this solar system will allow no other alien races to interfere with Earth bound humanity. UFOs can not be defined within the construct of the Extraterrestrial Hypothesis as our Spider masters have devised a system both to prevent other extraterrestrial influence and to enslave the human race for some unknown end game. As Charles Fort once so eloquently stated in his published work “The Book of the Damned,

“Would we if we could, educate and sophisticate pigs, geese, cattle? Would it be wise to establish diplomatic relations with the hen that now

functions, satisfied with mere sense of achievement by way of compensation? I think we're property"

I would argue that Hatibow, too, would agree that we are property.

UFO Definition and Purpose

Hatibow defines UFOs as one of two things :

- A) a closed system for sustaining life or
- B) probes/equipment used to monitor the state of the environment.

The first type of UFO (Type I) is essentially a closed system providing life support. If a celestial body does not allow for the formation of a living cell and a system of life support, a UFO is required to provide those attributes to that system. By doing so, the UFO can support life by providing a unique and engineered frequency balance (ie octave generation) to the biostructures and matter within that closed system. Examples of this type of UFO in Hatibow's work includes: the Moon and fifteen other satellite bodies in our solar system.

The second type of UFO (Type II) defined by Hatibow is that of a UFO being a Mobile Control System. On Earth,

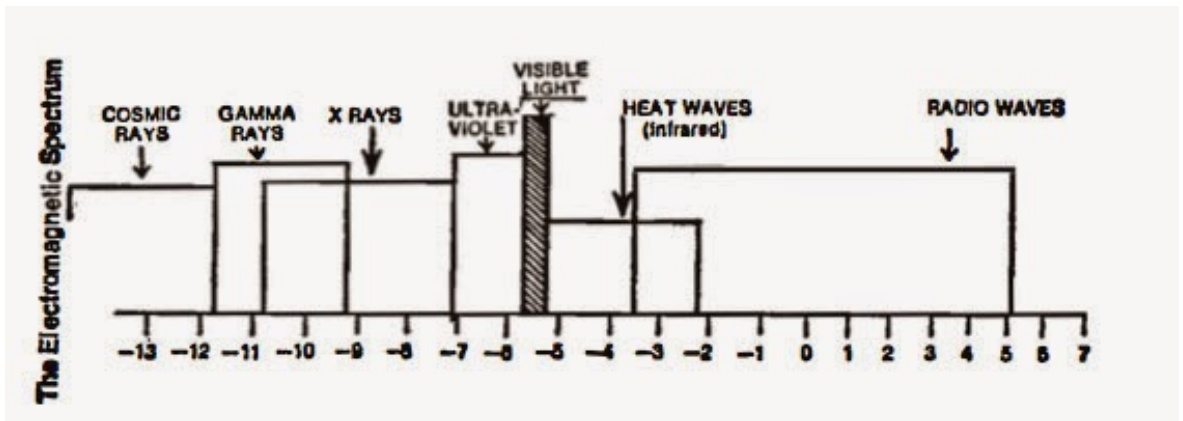

they serve two purposes. UFOs that monitor the atmosphere move up to a height of 424 km and are able to form ball lighting (orbs?) through movement through our old friend the “tubes” and can increase their size up to 124 times in size. UFOs that monitor the maritime environment allegedly have 16 bases underwater.

In total, there are 3,264 objects on Earth. There are **128 different types of UFOs.** Each type is designed to solve individual problems in the system and exist in the k-structure (if a UFO is removed from a k-structure, a UFO accident may happen). As mentioned in the previous post, the Complex that controls UFOs is in the Great Lakes Region of North America.

What type of equipment does a UFO have? To add to the confusion, Hatibow mentions at one point that “some” objects are equipped with laser weapons; at another point Hatibow mentions that all UFOs have lasers. The purpose of the laser is to provide feedback to the control centers at the appropriate grill or layer of Earth.

Another critical piece of equipment to the UFO is the “protective field”, or camouflage, that UFO’s have. The protective fields allow for the superposition of light, wherein the color spectrum is shifted and all colors are mixed. If any of you recall John Keel’s work regarding the

transition of UFOs from the subspectrum, to the visible spectrum and back to the subspectrum, this protective field sort of makes some sense.

The type of graphs included in Keel's Operation Trojan Horse and The Eighth Tower

There is one example that Hatibow provides in respect to Type II UFOs and their purpose. The example discusses the need for civilization change on the planet, wherein type II UFOs were tasked "to destroy civilization in North Africa." UFOs ultimately disrupted good soil into sand and created the Sahara Desert. With no soil to plant crops, civilization ended. For whatever reason, the Supersystem and System dictated that North African civilization end; UFOs complied with the command, and the command was executed.

To summarize quickly, Type I UFOs provide for the existence of biostructures in conditions that do not naturally

allow for biostructure existence. Type II UFOs monitor the atmosphere, the water ways, receive instructions from Complexes on Earth, and provide feedback to Complexes on Earth. When needed, Type II UFOs can assist in the engineering and destruction of Earth or civilizations on the planet.

Type I UFO Occupants

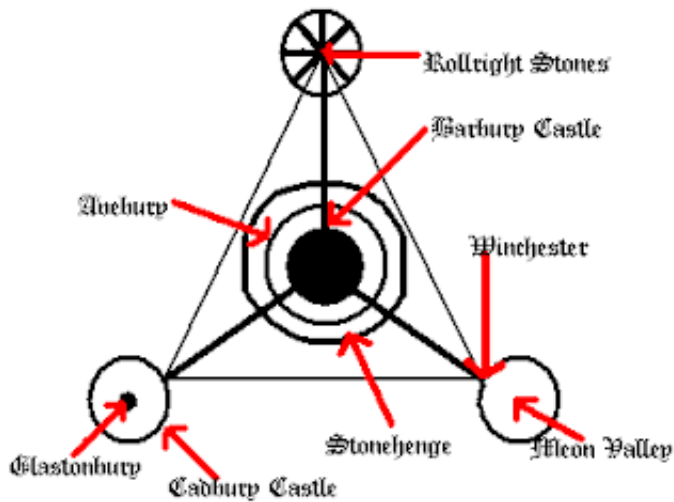

Who flies these UFOs? Hatibow states that approximately 66% of UFOs act as piloted Mobile Control System. UFOs with pilots are designed to perform specific tasks on our planet (as mentioned above). The original UFO pilots were human beings with spider brains implanted into the human biological structure (ie the original ones/first ones/original gods?). The UFO-naughts were then engineered into human biological structures excluding intestines, a digestive tract, and a reproductive system. Another described pilot of UFOs is listed as being a biological structure up to 280 cm and having “8-paws”. Is this the Spider race yet again? This one I’m not quite able to figure out. Let’s assume going forward that there are indeed two types of biological pilots : human being pilots and 280 cm large arachnids.

The 34% of UFOs remaining are computer UFOs. The computer UFOs are part of the control system in way that

they provide feedback to complexes around the globe. Ireland, again mentioned in the previous post regarding Complexes, assists with monitoring and management of computer UFOs.

Location of Type II UFOs

As previously mentioned in Hatibow's God : The Land Management System, UFOs exist on Earth at -3300 > height > -4400 meters. UFOs are connected to one another and to other Complexes of Control on Earth through 2,200 meter diameter tubes. The tubes create a direct link to "energy pumping structures". As a side note, the suspension of these tubes/wires and the energy directly tied to these interconnected tubes/wire allows for the flow of water on the face of the Earth. Hatibow also states that there are gravitational units that direct the flow of water. **If we assume the Moon is truly a façade, and the Lunar Wave a transmission of information to Earth, then the problem regarding oceanic waves is solved. The Moon does not create tides; the interweaving tubes, wires, and associated fields of energy below the surface create the movement of water on the face of the Earth.**

Another interesting note on the location of UFOs as provided by Hatibow relates to crop circles. As all UFOs originate from below Earth's surface, the UFO is either below an occupied space or below a residential/city dwelling. When a UFO is called on to rise from below the ground, the frequencies and octaves needed to move the UFO from below ground to atmosphere manifest as circles. If the UFO is below a field of wheat or other crop, a crop circle forms. If a UFO manifests below a residence, the circle is still created, but is not as likely to be noticed by the inhabitants of the residence. Anything from internet disruption to building destruction could be caused by the activation of a UFO. If one were to extrapolate this idea out even further, we are suddenly in the arena of ley lines, poltergeists, and other psychical phenomenon associated with the concept of "zero point energy."

Fuel Source of UFOs (or Tritium)

As previously mentioned, Tritium exists in Layer II or the hydro acoustic layer of our planet. Let's get the scientific definition out of the way first :

Tritium³ H – radioactive radionuclide superheavy hydrogen with mass number 3. $T_{1/2} = 12.35$ years. Under normal conditions, tritium – gas, $t_m = -252.52^\circ \text{C}$. In combination with oxygen forms a super-heavy water, tritium T_3

Naturally forming tritium is, per Wikipedia, extremely rare on Earth. In our society, tritium is used to create atomic weaponry, and due to atomic weapon testing, has fallen into the world's ocean waterways and can act as a “tracer” for different populations in Earth's various systems (not Hatibow systems, but biological and environmental systems).

Hatibow, naturally, would argue against the Wikipedia definition. Tritium, in reality, is:

Is not infinite in quantity

Is inherently part of water on the planet Earth (both fresh and sea water)

Distilled through the use of special installations, or generators in the System with the use of water

Tritium is create through (I think) a reverse osmosis style process, wherein water is recycled or reduced in some format, and tritium is retrieved

Water has specific gravity of 1 g / cm ³ at rest; when tritium is removed from water, water has a reduced specific gravity of .77 g / cm³

Is the necessary life force for brains of all genotypes

Tritium in water restores the frequencies of the brain

Stored on satellites within the Super System in order to provide fuel for long distance space travel

And, in the case of the subject of this post, the fuel source for UFOs on the planet Earth

As with most of modern science from Hatibow's perspective, the current understanding of tritium is incorrect. Hatibow states that tritium's true structure and properties are not known by modern academia.

Movement of Type I UFOs

A Type II UFO is able to travel one of two ways. For deep space travel, a Type II UFO needs the safety of a closed system Type I UFO for interstellar travel. Once the Type I UFO is anchored to the appropriate planet with the use of a gravitational tube, the Type II UFO can use the "tube" for safe travel to and from the Supersystem to the System.

Once a UFO is embedded into Layer 4 of the Earth's System, a different mode of transportation is required. The ultimate goal of a Type I UFO is to lift off, perform a requested task, and return to below the Earth's surface. The basics of movement are essentially as follows :

A "rise" command is executed from one or multiple Earth Complexes

The UFO forms a conical path or array of travel to the atmosphere, wherein frequencies are generated
UFOs traverse to atmosphere either electronically or magnetically (50 or 60 octave, respectively)

Tubes are formed on the surface of the ground

UFOs discharge from tubes in form of ball lighting (again, orbs?)

Tube creation and UFO discharge generates a sulfur smell

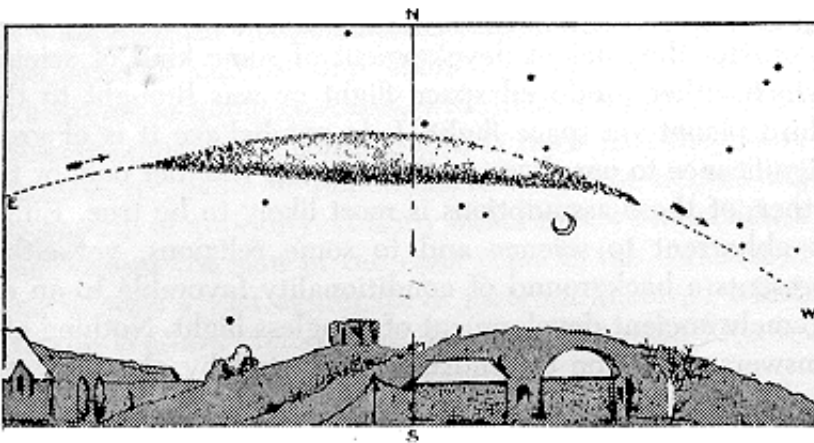

The process takes 12 days for the UFO to move below ground to atmosphere

This part is very tricky to work through. There is a lot of mathematics, octaves, k-structures, tubes, and other esoteric ideas embedded in Hatibow's Ufology segment. Yet I think at the end of it all, Hatibow is essentially stating that these UFOs modify their matter through the use of octaves, pass through the layers and lattices of other masses of the Earth as an object with no Neinertsionnaya weight, modify form in atmosphere my returning to a

Neinertsionna weight generating mass, perform the requested tasks, then move back to a non matter object and return to their starting point. This is touched on in respect to crop circles, and if I read Hatibow's work correctly, explains why crop circles occur in the same spots on the planet repeatedly.

I'm not 100% certain on this translation or understanding, but it makes some sense to me given the parameters and inputs of his work in context to the larger body of knowledge. For everyone's reference, the majority of this exists in the article "And UFO Also".

An Example of UFOs on the Moon and the Moon

A great example of both types of UFOs in existence and working in parallel is described in Hatibow's Moon Objects paragraph, one of my favorite passages of his work. I'd paraphrase, but the translation is too good to pass up :

All the “lunatics” are inside the moon. The atmosphere of the moon is only necessary for the control and the existence of this atmosphere without protection is impossible. To control the surface and atmosphere of the moon has its own objects (UFOs). It is – mostly machines, but some of them manned. Maximum lift height is less than 2 km from the surface. “Sleepwalkers” is not intended for life on Earth, they have plenty of comfortable conditions for work and leisure. Total lunar object 242 (36 types), 16 of them manned. Similar facilities are available on some satellites (and on Phobos, too).

Conclusion

So where does this segment leave us in respect to the Hatibow Hypothesis? (if anyone makes t-shirts with that slogan, please don't forget about me!) UFOs, as defined by Hatibow's paradigm, fit surprisingly well with the some key points to existing UFO lore. You've got :

Human being UFO occupants accounted for

Shape shifting/growing anomalous Orbs accounted for (UFOs/fae lights/ghost lights)

Color changing/color bending UFOs accounted for (the material of John Keel)

Teleporting UFOs accounted for

Shadowships as observed by Crrow777 and Houston

Skywatch accounted for
Underwater UFOs accounted for (Ivan T Anderson stuff)
Underground UFO bases accounted for
Ley Lines and possible psychical activity associated with
UFOs accounted for
Occult/vibration based hypotheses of UFOs accounted for

As for your prototypical UFO occupant such as the Grey, or any other number of non humanoid looking UFO pilots, where would they fit in respect to Hatibow's work? There is really no mention of a "Grey" (as far as I can tell). If one were to be speculative, one could argue that the before mentioned arachnid pilot could, in theory, require a "space suit". Hatibow explicitly states that no human being will ever see a Spider exit a UFO. What if that space suit were that of the Grey? Author / researcher Nigel Kerner did touch on this concept of space suit in his book "Grey Aliens and the Harvesting of Souls" (forgive me Nigel, I did not finish your book). Is that a possible solution? I know I'm reaching here, but hey, that's what blogging is all about!

Either way, the UFO is a critical part of the alleged Land Management System placed on Earth. As with all things Hatibow, one could argue this is pure science fiction or pure systematic control of the Earth and its residents. Did Hatibow have a fantastic knowledge base of the fortean

world, and utilized UFOs and octaves as a sort of “unified field theory” to account for a majority of fortean phenomena? Or is the activating of a Type II UFO ultimately responsible for fairy sightings, UFO sightings, and other paranormal experiences? At the end of the day, the next time Crrow or Houston Skywatchers upload a video with an orb or a shadowship, I personally will rule out the idea that ET has come to visit Earth. Instead, I may very well wonder what exactly has changed in respect to our System’s parameters, or what has challenged an existing order from the Super System, and wonder who or what exactly the corrective action will be focused on.

Khatib Alexander, B Makov, and the Great Forgotten Tragedy of the Human Race

sagesigma.blogspot.com/2015/07/khatib-alexander-b-makov-and-great.html

This is just a statute

Are Spiders our First Gods? Not necessarily so, at least to Alexander Khatib / Hatybov (I'll use Hatybov going forward) On this post, I'd like to move through prehistory; more specifically, I'd like to present a possible model regarding the years 45,000 BC through our calendar year 17304 BC. The basics of this post is to touch on the previously existing Super System and System in place in our solar system, and the changes made to the existing Super System and System by an invasive species.

Again, as mentioned in the caption above, I am in no way stating any of this to be fact or absolute truth. This information is my best representation of material currently published on line. This is purely a summation of translated works from the authors of Alexander Khatib and Boris

V Makov; I did not/do not know either of these people so I can not speak for the basis of their published ideas. My intention is to summarize the works for an alternative potential and to generate new ideas. Is this possibly high science fiction? Heck yeah!

More importantly, however, the work could very well be parallel to other myths and legends out there, and the more information we all share with one another, the more we could possibly learn.

With that being said, let's get into it. I'd like to include a few new definitions to the conversation for everyone's reference going forward:

Cluster: a group of homogenous units that, in context to one other, act as an independent unit in aggregate, and share certain properties or attributes that are common to one another.

Star Cluster: a group of stars that are connected to one another via gravitational/informational "tubes" (see previous articles for discussion on tubes). The connected stars share a common energy structure/model that manages the star cluster with specific ranges of octaves.

Galactic Cluster: an autonomous Super System (refer to

“Hatibow’s God”). It is endowed with a single functional software system, a single system of management, the ability to create, control, and maintain complexes. A galaxy cluster is linked to star cluster with complex links through interconnection tubes.

Civilization Cluster: a group of civilizations that share the same software / program parameters that manage specific stages of the development of civilizations.

Rough stuff once again, but I tend to think that you essentially have a cluster of planets and moons that have been pre-programmed to generate a return on some species of life. In the case of Earth, you have a system of organization, management and control that keeps Earth and its biological structures moving in some predetermined fashion; through indefinite feedback between the origin of the program, the program feed to the Super System, System and Subsystem, civilization progresses over time and is managed through upper and control limits predefined by the initial program and managed by the Super System through Subsystem. Good stuff, yes, but a bit in-depth. I’ve attempted to put a visual together to best define the Earth Cluster’s initial program for everyone’s review and feedback in the conclusion section.

The Key Clusters or Players of this Tragedy

A) The Orion Cluster Group of Civilizations

In respect to Earth, the cluster responsible for the engineering of the first half of the first phase of proto-human development on Earth, or the phase of “preschool” Engineering of Earth/Human civilization belonged to the management of Trustees from the Orion Cluster Group of Civilizations.

The Orion Cluster Group acts also as the Home Stewardship Program to support Earth civilization

The Orion Cluster Group consists of 384 “training places”, or starter civilization planets

One interesting note about Orion is included on Hatybov’s “Mount Kailash” article, where in he mentions the labyrinths below Kailash that store the legendary Orion Black Stone.

B) The Sirius Cluster Group of Civilizations

The Cluster responsible for the second half of the first phase of proto-human development on Earth

The Sirius Cluster acts as the “caregiver” to civilizations

The Sirius Cluster Group consists of 783 student civilizations

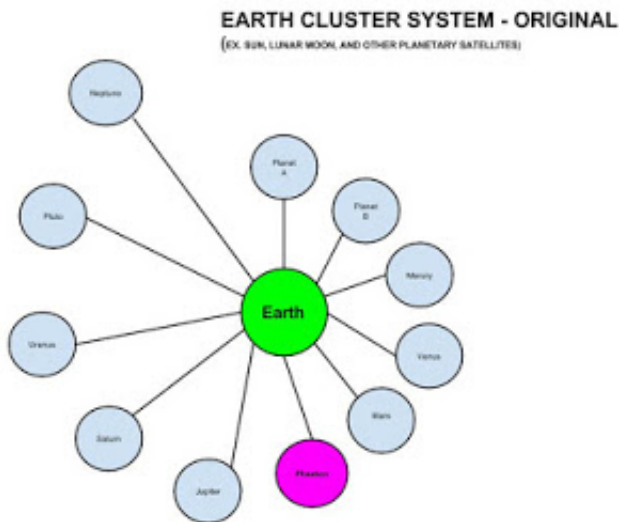

There should be 784 civilizations, but Earth is no longer part of this Cluster (more on that in the next section)

C) The Earth Cluster Group of Civilizations

The original makeup of our present solar system

The Earth Cluster Group originally consisted of Mercury, Venus, Earth, Mars, Phaeton, Jupiter, Saturn, Pluto, Neptune, Uranus, and two unidentified planets and/or moons

The initial design and engineering of this cluster is still unknown to this researcher at this time

D) The Ebrovskoy Cluster Group of Civilizations – Эбровской Системы Управления

A dying Cluster Group hailing from the Constellation Ursa Major – Planet Sur

The Civilization had existed for 5.5 million years in what is commonly known as the Big Dipper constellation

The Ebrovskoy Cluster consisted of 1 Planet (the Sun), and 3 Moons

Ebrovskoy Cluster also included :

12 type 960 major facilities

54 satellites

3862 attack objects

The Ebrovskoy live on the planet Sun; at the time, there were over 1,200,000 Ebrovskoy entities on / in the planet Sun

The Ebrovskoy species were a spider race up to a size of 4 meters (height/length?...not sure)

The Ebrovskoy, a species not uniquely capable of inclusion as an intelligent species of the cosmos, is searching out another species of life that they can merge with and move to higher form of life form.

A Potential Timeline to 17304 BC

With various cluster civilizations defined, let's begin the timeline:

45000 – 40000 BC – At this point of our history, we were already on this planet. There is no mention of where we

initially originated from, but I believe the literature states that mankind was on this planet previous to this time period, and Earth was created previous to this time period. The Orion Stewardship Group decides that our species is to be included in their Stewardship Civilization Program and takes ownership of orientation of planet Earth. A predefined program is set in place by Orion engineers.

26844 BC – The Ebrovskoy Cluster initiates movement towards the Earth Cluster Group; the Ebrovskoy Cluster takes nearly 8,500 years to converge upon the Earth Cluster. The belief of some researchers is that the Ebrovskoy had been actively seeking out an opportunity to join the community of intelligent life in the universe, and determined that the Earth Cluster was their best opportunity. I do not know why the Ebrovskoy was considered/considered themselves as a “non intelligent species”. There is some discussion that the Spider brain, existing in lower Octaves, needed the human body and the Earth Cluster to exist in higher Octaves, to evolve as a higher life form in the cosmos.

18344 BC – The Ebrovskoy Cluster begins “attack” on the Earth Cluster. The Earth Cluster is weak at this point due to the fact that Orion Cluster has begun the transition to Sirius Cluster; at this point of weakness, the Ebrov

“attacks.” Hatybov/Makov is explicit at this point that this isn’t a “Hollywood type battle”; rather, this attack takes place over the course of 1,040 years. It is at this point that the transition of Earth’s watch from the Orion Cluster to the Sirius Cluster that Earth is most weak in terms of Super Structure Defense. Earth’s Cluster Super System defense mechanism, Phaeton, is occupied by the assailants from the Ebrovskoy Cluster. The invaders occupied Phaeton, wherein Phaeton destroyed itself and 2 moons of Cluster Ebrovoskoy, 11 major facilities, and 1,200 attack objects. The remains of Phaeton now reside as a meteorite belt between Mars and Jupiter. The existing planet Sun and Lunar Moon are placed as new constructs of the Ebrovskoy Super System.

18300 BC – Earth is captured by the Ebrovskoy Cluster and its residents. The Ebrovskoy Cluster begins the process of destroying the existing systems of control of planet Earth. In the process, the Ebrovskoy Cluster begins the installation of the Ebrovskoy Land Management System of our solar system. This includes :

Formation of satellites around other planets – not sure if satellites were part of convoy or if constructed from “scratch”

The dismantling of life support systems of other planets
The elimination of all inhabitants on planet Earth

17304 BC – Ebrovskoy Land Management System successfully destroys all living things on planet Earth and other planets of the solar system. Complete control of the Earth Cluster is obtained; all neinertsionnye energy is captured, and Earth is surrounded by a convoy of the solar system. At this point, Earth begins to drift back to the constellation Ursa Major. Also at this time, the autonomous system placed on the development on Earth per the Orion program ceases to exist, and humanity is now programmed with the “violent” Ebrov control system. It is at this point that the Ebrovoskoy begin the “great experiment” wherein the arachnid brain and motives are merged with the biological structures of the human species.

Conclusion

If the above presented scenario is true (and I’m most certainly not saying it is), let’s consider what this all means:

Earth was populated with humans over 100,000 years ago; by who, we do not know

The Orion Cluster chose to include us in their civilization model/design program. The Orion cluster group utilized existing control systems on this planet to take Earth and its human civilizations from point A -> point Z

Once Orion’s program was put in place, the Sirius Cluster was to “babysit” Earth during an initial preschool phase

of human development

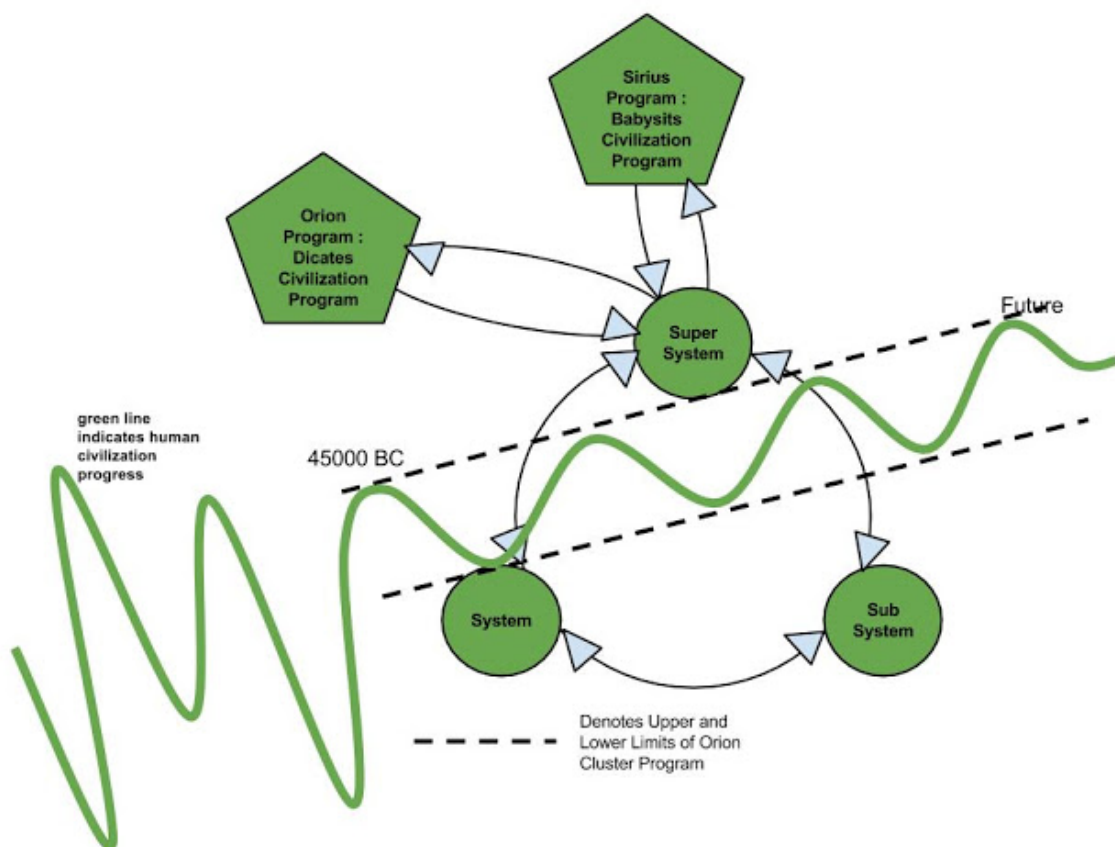

During the transition from Orion to Sirius, the Ebrovskoy Cluster, hungry for inclusion into the “intelligent species” of the universe, and not able to evolve to into an intelligent species independently, moves into the Earth Cluster The Earth’s Cluster, despite Phateon defending the Super-system as best as it can, is not able to defend itself from the Ebrovskoy; the Ebrovskoy Convoy claims Earth as an asset

Orion’s program and complexes of control are overwritten by the Ebrovoskoy; living humanoids on this planet, Mars, and possibly other planets in our solar system are completely annihilated and exterminated

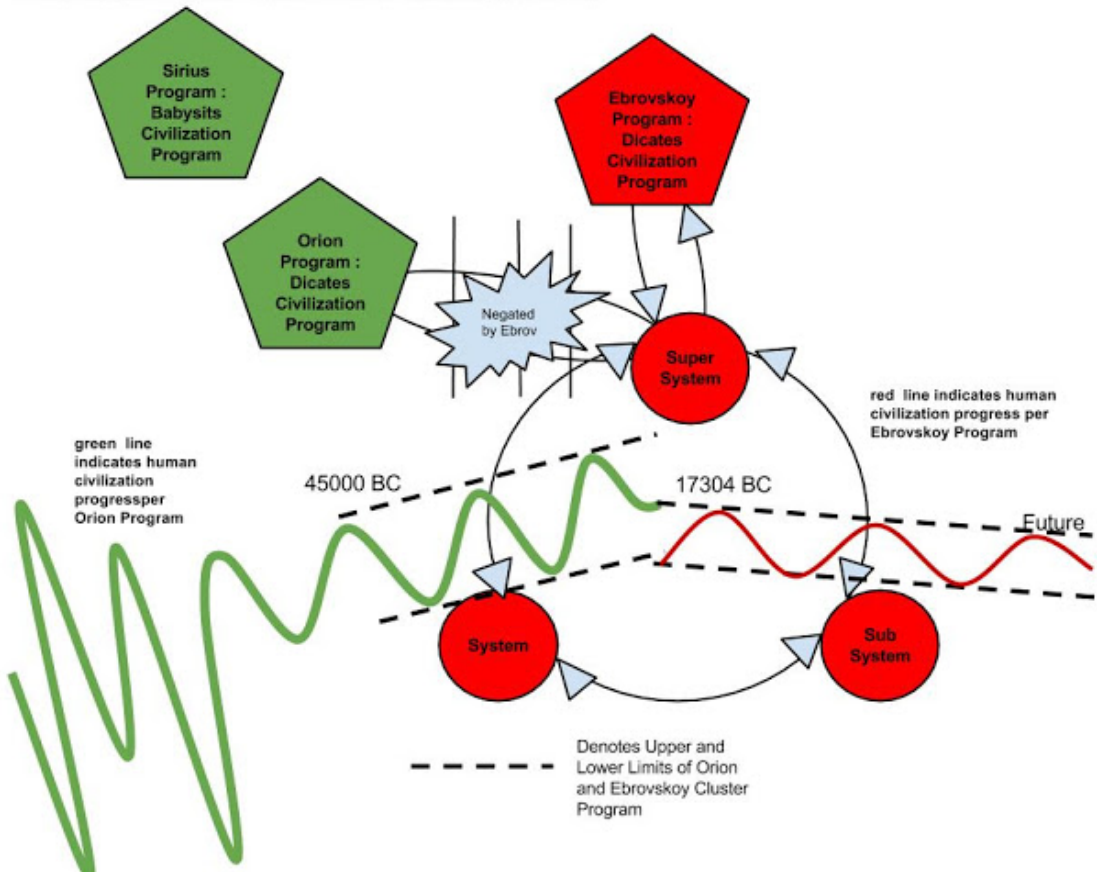

The Ebrovskoy Land Management System is installed within our solar system, and the “great” convergence of spider brains/motives within humanoid bodies begins

Two diagrams are listed below to attempt to model out the theoretical Orion Model and the alleged actual Ebrovskoy Model.

Initial Plan for Earth Cluster Civilization

Interventionist Violent Plan for Earth Cluster Civilization

This is intense stuff worthy of an epic fictional novel. If all of this were to be true, this is an epic tragedy of humanity. We were to be a guided civilization set in motion towards some unknown end, and in a sad turn of events, a violent and intrusive species captured humanity, bent on becoming an evolved species, and their “violent” management procedures were installed in place, converting our original intent into something less than desired. We are left with the remnants of something very different than our initial state or our initial design. It would be interesting to overlay some of the legends of

Sirius, Orion and the Ursa Major with the story line above. Could Hatybov have reverse engineered his “story” with that of the ancient myth? Or did he truly discover the story line of the planet in 1985 and began his war against against the Ebrov System? I certainly don’t know the truth.

Up next, **I will present the years 17304 BC to 1605 BC.** There is talk of horrendous experimentation, Great Floods, System overhauls, and UFO Object 440.

And Once Again, I am not saying any of this is true; I am presenting the material as best as I am able to for an English reading audience and further discussion. If it is indeed ravings of a fictional history, I’m ok with it. The source material is specific, complex, heavy on math, and provides an incredible story, fiction or otherwise, presenting reality. Until next time, drop a comment or line and I’ll do my best to further explain any of the above. Thanks again for the read!

The Great Interventionist Program Begins – Hatybov, Human Experimentation, and Object Type 440

sagesigma.blogspot.com/2015/08/the-great-interventionist-program.html

The next phase of this blog is to look into the critical transition from 17304 BC to 1605 BC, or the “Age of the Creation of the Shirt”. The material directly related to Hatybov is very, very limited in respect to this stage of Earth civilization post-Ebrov intervention. Instead, I have had to make the following assumption regarding materials discussing this time period: a group of Russian researchers have or did have access to additional Hatybov material that is currently not available or published online, and they have attempted to present it as best as possible through an assortment of various posts, articles, and other entries online (and in the Russian language). In turn, I’m attempting to summarize the information as

best as I can for the English reading population for review, feedback, and critique.

This is a critical gap in the direct Hatybov material, wherein Hatybov talks about the original interference created by the Ebrovskoy (Ebrov) Cluster System, and later discusses the importance of the genotype. The period of history, from what I can gather on line through various webpage details and links, is the period that connects the Ebrov attack on Earth and the formation of Genotype 421.

So please let me start by briefly catching everyone up to this point in time (see Part 1 for more info:)

“The Ebrovskoy Civilization Cluster has destroyed Phaeton, a unique part of the Earth Civilization Cluster Super system

The Ebrovskoy Civilization Cluster has destroyed all life on Mars and Earth, as well discontinue life support systems on other planets of our Solar System

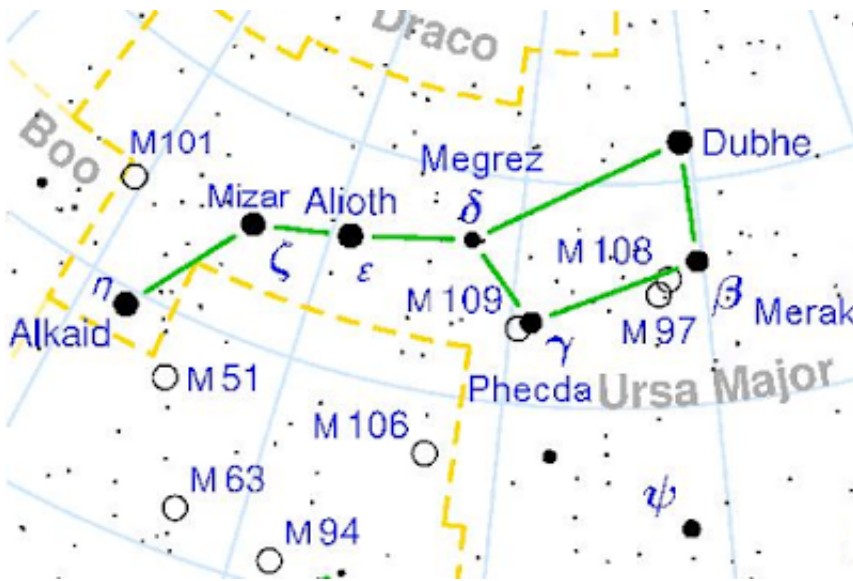

The Ebrovskoy have implemented the Planet Sun and the Lunar Moon as new components of the Ebrov Super system

The Ebrov begins to implement a new Land Management System on Earth

The Hatybov mythos now moves into the time period of 17304 BC – 1605 BC, or better known in the Ebrov system, the era of the “Creation of the Shirt.” The shirt, as best described by the research, is the “flesh jacket” or “human appearance” of the arachnid brain. There are essentially Four Epochs of Violent Civilization attempted, wherein each epoch represents the Ebrovskoy forced convergence of the arachnid brain with the human body. A successful implementation does eventually take place, but only after many trials, deaths, modifications to system controls, and changes to the planet occur over this 16000 year time period.

A few basic definitions to start with:

Ebrovskoy Cluster/Species/System / Эбровской Системы
Управления: A dying civilization of lower intelligent Spider life forms hailing from the planet Sur 4 of the Ursa Major Constellation System

Object 440 /

Объект тип 440: A special object of the system; a type I/II UFO that is plasmoid in nature. Consistent with other Hatybov material, there is quite a bit of detail related to Object Type 440. The idea of the Object Type 440 is that of a multiple functioning UFO. It has the ability to trap and sustain life energies, travel to and from the Earth to the Lunar Moon, and dictate behavior in proto type life forms.

Let's begin!

The First Epoch of the Conditional/Violent Civilization – 17304 BC -> 13344 BC

Upon takeover of the planet Earth, the first order of business of the Ebrov was to shut down and destroy existing systems of complexes and control on the planet Earth due to unfamiliarity of the previous management systems ori-

gins and construction. In an effort to join the “higher species of cosmic life” and survive as a species, the Ebrov, not able to evolve into the a higher life form independently due to the fact that their brains exist at the 31 Octave, have captured the “essence” or energy of previous human beings on planet Earth with brains existing in the 96 – 124 Octave range, and physical forms existing in the 32 – 72 Octave range. Humans cease to exist on a physical plane; the energies or souls (for a lack of a better world) are imprisoned. The energies of this target population are kept in Objects Type 440.

The Ebrov begin to then prime the planet Earth to be hospitable for the spider biological entity. It is at this stage that the Ebrov begin the creation of their “water type”; water which is rich with tritium. Upon creation of this new water source, sand is a byproduct. It is interesting to note that the surface level of the Earth at this time is - 4300 meters below the current sea level. The Ebrov, having destroyed and halted previous complexes of control, begin to place own control apparatus at -4300 meters and being to fill over the units with magma in order to prevent future human destruction of the control complexes. The Ebrov then convert the Earth’s atmosphere to an Oxygen/Chlorine mix in order to survive as a biological entity.

The first test phase of human biological experimentation begins with 2%, or 17-20 million people of the population captured in Type 440 Objects. The first humanoids are 1.88 meters in height (versus Ebrov Spiders who measure 2.5 – 4.0 meters in height); they carry limited metabolic processes, the ability to breath the new atmosphere, and are able to survive the habitat of the new land management system on Earth. This human brain is engineered to begin this stage of creation at the 31 Octave (again, this differs drastically from the original 96 – 124 Octave range). Humans have limited capacity for logic and reason, as well as limited perception the physical reality around them.

At the conclusion of 3,690 years, the First Age collapses upon itself as the human species and other forms of life are built on Ebrov violence and parasitism. The First Age is “ruthlessly” destroyed with in a two day period in the year 13954 BC.

The Second Epoch of the Conditional/Violent Civilization – 13344 BC -> 10804 BC

A second generation of humanoids are now engineered under the guise of the “Energobiogenezisa cells of the flesh”; the Ebrov, realizing the spider flesh is weak in comparison to human flesh, center new humanoid struc-

tures around the original flesh of human beings (pre-Ebrov intervention).

The second phase of human biological experimentation begins with 21%, or 200 million people. In order to advance the functionality of the human species, and to merge the lower Octave arachnid brain with the human body, Object Types 440 are utilized to control the test population. Emphasis is also given to extending the biological life of humans to a life span greater than 18 – 22 years of age, transforming the human metabolic system to depend on carnivorous diets, and given to the manipulation of Ebrov water density and frequency characteristics to support human life with brains operating at a lower Octave.

The Ebrov raise the surface level of the Earth from -4300 meters to -3000 meters, which in turn creates more land on the face of the Earth. The Ebrov also successfully synthesize a pre Ebrov / post Ebrov system type flora and fauna system, and additional land area allows for fauna and flora to develop and grow. This achievement allows for the sustenance and survival of primitive social structures and orders of the Second Age. Pyramids are also placed on the Earth and filled with sand (I think that these pyramids are essentially mountains covered with dirt, but not 100% sure on that).

Again, the synthesis of the arachnid brain and the human body is not completely successful; extermination of all experimental beings occurred in the year 10804 BC

The Third Epoch of the Conditional/Violent Civilization – 10804 BC -> 6234BC

The third phase of human testing now utilizes another 20% of the captive population. New human test subjects are now equipped with better metabolic processes, a digestive system able to consume raw meat, and a “brain atmosphere” that is beginning to operate independently of Type 440 Object controls. Once again, the complete assimilation of Ebrov brains and human physical bodies is not successful, and all test subjects are terminated.

It is after this third extermination that the Ebrov fill the Earth’s surface from -3000 meters to -1200 meters. On this new surface, the Ebrov lay down an 86400000 “power pole direction of the tire” (I’m not sure what the means). Also, all planted and managing complexes are connected through an energy grid, and all software features are fine tuned to begin start up of a Fourth Stage of Civilization. Upon completion of this task, the Ebrov now raise the surface level of Earth from -1200 meters to -100 meters, and commence the “Great Flood”, wherein 1500 meters of rain flooded down on the face of the Earth. The “Great

Flood” generated three results: the transformation of the Earth’s surface to something we recognize today; the creation of bodies of salt water; and the removal of the physical consequences of human experimentation to that point in time.

The Fourth Epoch of the Conditional/Violent Civilization – 6234 BC -> 1605 BC

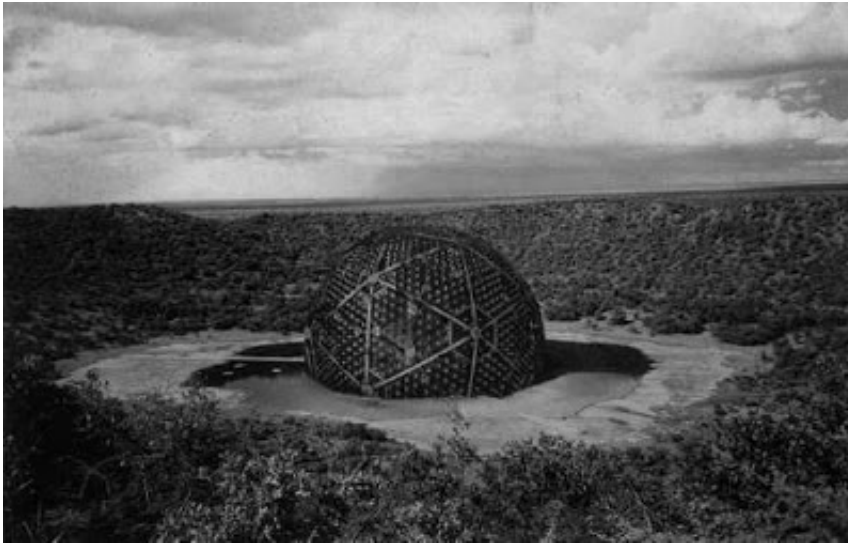

The Ebrov have finally moved the final stage of human experimentation. It is suggested that by mid September 3761 (again, the specificity), the appearance of humans was successfully finalized and provides the basis of “the image and likeness of the God” per the Bible and other myths/legends. Approximately 250 years later, “tents” of this Fourth Stage of humanity begin to take shape on the planet Earth. A “tent”, as best as can be described by this author, is a rudimentary clump or cluster of people who share a common language, common values, and common conditions of the environment. Object Type 440’s, although not as critical in directing human activity. begin to assist human definitions in respect to finding shelter, food, and safe recreation. The Object Type 440s are also instrumental in beginning to provide the human species the ability for logical/critical thought, the ability to send and receive information through conscious speech, and the ability to observe reality as dictated by the Land Man-

agement System.

Also of interest, the Mayan Civilization is mentioned at this point. The Mayan Civilization, per the literature, was a special Ebrov experiment loaded to the control complexes of the Andes Mountains. The Mayans were used to test individual mantissas, or fractions, of future base genotypes needed in the future.

No mention could be found that this phase of humanity was ultimately killed off. As the Ebrov brain has yet to be fully implanted in the human body, I would gather that this group is also ultimately destroyed. One interesting point an author mentions on one Russian text is that level of ignorance on the part of the Ebrovskoy in understanding the living cell over this 16000 year period “all ended in failure, and the skeletons of various horrific creatures and their experiments are still found.”

Conclusion

Again, at the end of the day, you can sense the overriding logic of this history and mythos. You have a parasitic species (the Ebrovskoy) of life form that exists at a lower form of frequency (Octave); that parasitic species targets another species that exists at a higher form of life frequency (human beings). Due to the violent nature of the parasite, it forces its will and way onto a virtuous species of life. As the parasitic species is not able to understand the previous controls in place dictating the virtuous life forms, it destroys everything. The parasite species then begins to rebuild and engineer a new existence based on a lower thought form; using the energy forms of the higher species, and using cold, hard scientific methodologies, attempts to evolve the parasitic brain, forcibly, into a much desired goal: higher cosmic consciousness. Due the arrogance and inability of the parasites to understand what existed before their interference, it spends 16000

years creating, manipulating, and destroying our ancestors and the Land Management System in an effort to successfully move the parasitic brain to the host biological entity.

As always with this research, the gaps are large and the missing pieces impossible to find on line. I've attempted to summarize as best as I can on the subject matter at hand. As always, please reach out to me if you have any questions, need further explanation, or have insight that I do not have.

Up next, a discussion on the success of the Ebrov to merge the arachnid brain with the humanoid, and the beginning of the fabled Genotypes.
